**PLEASE READ THE FOLLOWING AND SIGN BELOW:**

BRAS Thermography uses a Meditherm Digital Infrared Thermal Imaging camera to provide a 15-minute non-invasive test of physiology. DITI detects the minute physiologic changes that accompany breast pathology.

I understand that BRAS Thermography does not provide a medical diagnosis, but simply acts as the clinical Thermographer-transmitting digital pictures to EMI, a medical digital infrared thermal imaging service. An M.D. will interpret the images and return the images to BRAS. This evaluation may suggest further medical testing. If further testing is suggested I will consult my physician or health care provider. A doctor to doctor consultation can be arranged between Meditherm and your doctor if necessary.

I give my permission for the Clinical Thermographer at BRAS to take and submit DITI pictures for interpretation. I understand that by doing so, the Clinical Thermographer is not becoming my primary care physician. I understand that a copy of the report with images will be mailed or emailed to me so that I can share it with my health care practitioner or primary care doctor.
